Habitats Regulations Assessment	1
Assessment Process	2
HRA conclusions for the examined Local Plan	3
Assessment of proposed Main Modifications	4
Updated assessment of in-combination effects	58
Conclusions	59
Next Steps	59

## Introduction

- 1.1 In October 2017 Melton Borough Council submitted the Melton Local Plan for independent examination by a Planning Inspector appointed by the Secretary of State. A Habitats Regulations Assessment (HRA) Report was submitted alongside the Plan. As well as the main HRA Report for the Pre-Submission Draft Local Plan (October 2016), a Technical Note (June 2017) was also submitted which related to the Focussed Changes that Melton Borough Council make to the Pre-Submission Draft Local Plan prior to submission.
- 1.2 Public examination hearings were held between 30<sup>th</sup> January and 9<sup>th</sup> February 2018. At the invitation of the Council, the Inspector has prepared a Schedule of Main Modifications to the Plan, which is to be published for consultation from 10<sup>th</sup> May to 20<sup>th</sup> June 2018 inclusive. The proposed modifications take into account the matters raised during the examination by the Inspector and participating representors.
- 1.3 This HRA Addendum presents an assessment of the proposed Main Modifications and considers their implications for the HRA findings reported previously. In combination with the HRA Report and Technical Note submitted alongside the Local Plan for examination, this Addendum represents an HRA of the Local Plan as proposed to be modified, updating the findings presented in the HRA Report and Technical Note which accompanied the examined Local Plan. It should be noted that this is an Addendum to the HRA documents and that the Addendum, the full HRA Report and the Technical Note should therefore be read together.
- 1.4 This HRA Addendum focusses on the 'Main Modifications' to the Local Plan only. Additional Modifications have also been prepared to address non-substantive matters such as typographical, factual and grammatical errors. These Minor Modifications are not subject to HRA as they do not have the potential to lead to adverse effects on the integrity of European designated sites.

## Habitats Regulations Assessment

- 1.5 The requirement to undertake HRA of development plans was confirmed by the amendments to the Habitats Regulations published for England and Wales in July 2007 and updated in 2010<sup>1</sup> and again in 2012<sup>2</sup>. Therefore when preparing its Local Plan, Melton Borough Council is required by law to carry out a Habitats Regulations Assessment.
- 1.6 The HRA refers to the assessment of the potential effects of a development plan on one or more European Sites, including Special Protection Areas and Special Areas of Conservation:
  - SPAs are classified under the European Council Directive 'on the conservation of wild birds' (79/409/EEC; 'Birds Directive') for the protection of wild birds and their habitats (including particularly rare and vulnerable species listed in Annex 1 of the Birds Directive, and migratory species).
  - SACs are designated under the Habitats Directive and target particular habitats (Annex 1) and/or species (Annex II) identified as being of European importance.
- 1.7 Currently, the Government also expects potential SPAs (pSPAs), candidate SACs (cSACs) and Ramsar sites to be included within the assessment<sup>3</sup>.
  - Ramsar sites support internationally important wetland habitats and are listed under the Convention on Wetlands of International Importance especially as Waterfowl Habitat (Ramsar Convention, 1971).
- 1.8 For ease of reference during HRA, these three designations are collectively referred to as European sites, despite Ramsar designations being at the wider international level.

---

<sup>1</sup> The Conservation (Natural Habitats, &c.) (Amendment) Regulations 2007. HMSO Statutory Instrument 2007 No. 1843. From 1 April 2010, these were consolidated and replaced by the Conservation of Habitats and Species Regulations 2010 (SI No. 2010/490). Note that no substantive changes to existing policies or procedures have been made in the new version.

<sup>2</sup> The Conservation of Habitats and Species (Amendment) Regulations 2012. Statutory Instrument 2012 No. 1927.

<sup>3</sup> *Planning Policy Statement 9: Biodiversity and Geological Conservation*. OPDM, 2005.

- 1.9 The overall purpose of the HRA is to conclude whether or not a proposal or policy, or whole development plan would adversely affect the integrity of the site in question. This is judged in terms of the implications of the plan for a site's 'qualifying features' (i.e. those Annex 1 habitats, Annex 11 species, and Annex 1 bird populations for which it has been designated). Significantly, HRA is based on the precautionary principle - where uncertainty or doubt remains, an adverse impact should be assumed.
- 1.10 Details on how the HRA process has informed the Local Plan-making process can be found in the HRA Report for the Pre-Submission Draft Local Plan (October 2016).

## Assessment Process

- 1.11 **Table 1** below summarises the stages involved in carrying out a full HRA, based on various guidance documents<sup>4,5,6</sup>

**Table 1: Stages in HRA**

Stage	Task	Outcome
Stage 1: Screening (the 'Significance Test')	Description of the plan. Identification of potential effects on European Sites. Assessing the effects on European Sites (taking into account potential mitigation provided by other policies in the plan).	Where effects are unlikely, prepare a 'finding of no significant effect report'. Where effects judged likely, or lack of information to prove otherwise, proceed to Stage 2.
Stage 2: Appropriate Assessment (the 'Integrity Test')	Gather information (plan and European Sites). Impact prediction. Evaluation of impacts in view of conservation objectives. Where impacts considered to affect qualifying features, identify alternative options. Assess alternative options. If no alternatives exist, define and evaluate mitigation measures where necessary.	Appropriate assessment report describing the plan, European site baseline conditions, the adverse effects of the plan on the European site, how these effects will be avoided through, firstly, avoidance, and secondly, mitigation including the mechanisms and timescale for these mitigation measures. If effects remain after all alternatives and mitigation measures have been considered proceed to Stage 3.
Stage 3: Assessment where no alternatives exist and adverse impacts remain taking into account mitigation	Identify 'imperative reasons of overriding public interest' (IROPI). Identify potential compensatory measures.	This stage should be avoided if at all possible. The test of IROPI and the requirements for compensation are extremely onerous.

- 1.12 When assessing the effects of the Melton Local Plan in accordance with Regulation 102 of the Conservation of Habitats and Species Regulations 2010, there are potentially two tests to be applied by the competent authority: a 'Significance Test' followed if necessary by an Appropriate Assessment which will inform the 'Integrity Test'. The relevant sequence of questions is as follows:
- Step 1: Under Reg. 102(1)(b), consider whether the plan is directly connected with or necessary to the management of the sites. If not –

<sup>4</sup> *Assessment of plans and projects significantly affecting European Sites. Methodological guidance on the provisions of Article 6(3) and (4) of the Habitats Directive 92/43/EEC.* European Commission Environment DG, November 2001.

<sup>5</sup> *Planning for the Protection of European Sites. Guidance for Regional Spatial Strategies and Local Development Documents.* Department for Communities and Local Government (DCLG), August 2006.

<sup>6</sup> *The Appropriate Assessment of Spatial Plans in England. A guide to why, when and how to do it.* RSPB. August 2007.

- Step 2: Under Reg. 102(1)(a) consider whether the plan is likely to have a significant effect on the site, either alone or in combination with other plans or projects (the 'Significance Test'). *[These two steps are undertaken as part of Stage 1: Screening shown in Table 1 above.]* If Yes –
- Step 3: Under Reg. 102(1), make an Appropriate Assessment of the implications for the site in view of its current conservation objectives (the 'Integrity Test'). In so doing, it is mandatory under Reg. 102(2) to consult Natural England, and optional under Reg. 102(3) to take the opinion of the general public. *[This step is undertaken during Stage 2: Appropriate Assessment shown in Table 1 above.]*
- Step 4: In accordance with Reg.102(4), but subject to Reg.103, give effect to the land use plan only after having ascertained that the plan will not adversely affect the integrity of the European site.

- 1.13 It is normally anticipated that an emphasis on Stages 1 and 2 of this process will, through a series of iterations, help ensure that potential adverse effects are identified and eliminated through the inclusion of mitigation measures designed to avoid, reduce or abate effects. The need to consider alternatives could imply more onerous changes to a plan document. It is generally understood that so called 'imperative reasons of overriding public interest' (IROPI) are likely to be justified only very occasionally and would involve engagement with both the Government and European Commission.
- 1.14 The HRA should be undertaken by the 'competent authority' - in this case Melton Borough Council, and LUC has been commissioned to do this on its behalf. The HRA also requires close working with Natural England as the statutory nature conservation body<sup>7</sup> in order to obtain the necessary information and agree the process, outcomes and any mitigation proposals.

## HRA conclusions for the examined Local Plan

- 1.15 HRA screening of the Pre-Submission Draft Local Plan was undertaken in accordance with available guidance and was based on a precautionary approach, as required under the Habitats Regulations. The HRA screening conclusions for the Pre-Submission Draft Local Plan were that, although none of the policies in the Local Plan were considered likely to have significant effects on European sites, a number of the policies may result in likely significant effects on European sites, in relation to potential offsite damage/disturbance to habitats and non-physical disturbance, increased air pollution and increased recreation pressure. These issues were examined in more detail through Appropriate Assessment and it was concluded that, provided that the mitigation identified in the Melton Local Plan is implemented, adverse effects on the integrity of any of the European sites considered are not expected.
- 1.16 The potential for the Melton Local Plan to have likely significant effects on European sites in combination with the Local Plans for Rutland and Harborough Districts could not be ruled out at the time, due to the early stage of those plans and the lack of solid HRA conclusions.
- 1.17 The Technical Note that was prepared in June 2017 in relation to the Focussed Changes that Melton Borough Council proposed to make to the Pre-Submission Draft Local Plan concluded that the majority of the Focussed Changes are minor and would not have any implications for the HRA screening assessment undertaken previously. However, it was concluded that one additional policy (IN1) would be screened in and another would be screened out (IN2) in relation to transport infrastructure. When the Appropriate Assessment conclusions reached previously were revisited in light of the Focussed Changes it was concluded that, while a number of small allocations would be added or removed from the Pre-submission Draft Local Plan and the capacity and boundaries of others would be modified, the overall scale and distribution of growth remained broadly similar and policies within the Local Plan which provide mitigating effects would not be affected by the Focussed Changes. While changes to the proposed distributor road were considered likely to have a significant effect on local traffic movements at Melton Mowbray, it was concluded that these will be much less pronounced on the wider road network and are unlikely to

<sup>7</sup> Regulation 5 of *The Conservation of Habitats and Species Regulations 2010*. HMSO Statutory Instrument 2010 No. 490.

be significant on relevant stretches near Rutland Water SPA/Ramsar site, which are approximately 5km from the town of Melton Mowbray.

- 1.18 An updated review of local plans for neighbouring authorities confirmed that the majority had not progressed since the previous Appropriate Assessment was carried out for the Pre-Submission Draft Local Plan, and no additional in-combination effects were therefore identified.
- 1.19 The findings of the Appropriate Assessment of the Pre-submission Draft Local Plan therefore remained valid, and as such it was still able to be concluded that the Local Plan (taking into account the Focussed Changes) would not have an adverse effect on the integrity of European sites.

## Assessment of proposed Main Modifications

- 1.20 **Table 2** overleaf presents the schedule of proposed Main Modifications and the reasons for proposing each change, with a final column added to record the implications of each Main Modification for the HRA conclusions reported previously.
- 1.21 The HRA implications have been considered based on whether each Main Modification changes the conclusions of the HRA Report for the Pre-Submission Draft Local Plan, as updated in the Technical Note for the Focussed Changes.

**Table 2: Assessment of proposed Main Modifications in relation to the HRA conclusions reported previously**

No.	Modification proposed	Reason for the proposed Modification	Implications for HRA findings reported previously
MM1	<p><b>THE HOUSING REQUIREMENT AND ITS PLANNED DELIVERY</b></p> <p>4.2.2 The number of new homes.....more jobs and improve opportunities. The Melton Towards A Housing Requirement (TAHR)( January 2017) report and its addendum (June 2017) indicated that taking account of wider considerations, there was a clear justification for planning for between 5,750 and 7,000 dwellings, equivalent to 230-280 dwellings per annum. The Council has agreed a housing requirement of 245dpa, within that range. <b><u>The overall quantity proposed is 6125 houses over the plan period of 2011 – 2036. This quantity would meet the demographic needs with affordability adjustment identified by HEDNA of 154 per year (3850 over the plan period) with the additional quantity of 91 per year (2275) required to deliver the strategic and economic objectives of the Plan set out in Chapter 3. This additional quantity would be drawn from the unmet need present elsewhere within the Housing Market Area (HMA). Only the City of Leicester have formally declared unmet need up to 2031 and requested that unmet need be dealt with in the Melton Local Plan. Should unmet need be declared elsewhere within the HMA within the local plan period, the apportionment across HMA authorities of all unmet need arising within the HMA shall be agreed as set out in a Memorandum of Understanding (see paragraph 4.7.8). If the unmet needs apportioned to Melton Borough exceed the 2275 dwellings, there may be an need for a full or partial review of the Local Plan, in accordance with Policy SS6.</u></b></p>	<p>To clarify the derivation of the housing requirement and the source of additional housing needs that will be accommodate within the Borough.</p>	<p><b>No change to HRA findings</b> – the additional wording regarding the housing trajectory does not affect the overall scale or location of development proposed through the Local Plan. The additional information about the trajectory of housing development could indicate that any effects arising from the Local Plan are more likely to occur later in the plan period when rates of housing development would be higher; however this would also depend on which particular developments come forward at which point within the plan period. The overall effects of the Local Plan on European sites are not affected by the proposed modification.</p>
	<p>4.2.3 The <b><u>planned</u></b> delivery of this growth, <b><u>together with the sources of supply and the housing requirement over the whole plan period</u></b> is illustrated by <b><u>the</u></b> a trajectory <b><u>set out in Figure 6. The key components of housing supply identified to deliver this are identified in Table 2, together with the planned delivery and the annual housing requirement for different parts of the plan period.</u></b> <del>published alongside this Plan that will be regularly monitored and updated</del></p>	<p>To better reflect the plan’s spatial strategy and the reasonable prospects as to the pace at which the local housing market will adjust to the uplift of housing</p>	<p><b>No change to HRA findings</b> – the additional information regarding the housing trajectory does not affect the overall scale or location of development proposed through the Local Plan. As noted above, the additional information about the trajectory of housing development could indicate that</p>

No.	Modification proposed	Reason for the proposed Modification	Implications for HRA findings reported previously
		delivery	any effects arising from the Local Plan are more likely to occur later in the plan period when rates of housing development would be higher; however this would also depend on which particular developments come forward at which point within the plan period. The overall effects of the Local Plan on European sites are not affected by the proposed modification.
	<p><b>Figure 6: Melton Borough Housing Trajectory</b></p> <p>The chart illustrates the housing trajectory in Melton Borough. It shows a significant peak in completions and planned delivery around 2021/22, followed by a period of high allocations (up to 325 dwellings per year) from 2023/24 onwards. The stepped requirement remains relatively stable, fluctuating between 150 and 200 dwellings per year.</p>	To better reflect the plan’s spatial strategy and the reasonable prospects as to the pace at which the local housing market will adjust to the uplift of housing delivery.	<p><b>No change to HRA findings</b> – the additional information regarding the housing trajectory does not affect the overall scale or location of development proposed through the Local Plan. As noted above, the additional information about the trajectory of housing development could indicate that any effects arising from the Local Plan are more likely to occur later in the plan period when rates of housing development would be higher; however this would also depend on which particular developments come forward at which point within the plan period. The overall effects of the Local Plan on European sites are not affected by the proposed modification.</p>

No.	Modification proposed	Reason for the proposed Modification	Implications for HRA findings reported previously												
	<p><b>Notes</b></p> <ol style="list-style-type: none"> <li><b><u>The 'stepped requirement' line shows the annual amount of new housing required, which increases in steps so that the overall housing requirement of 6125 new homes can be met over the plan period.</u></b></li> <li><b><u>The 'planned delivery' line shows the annual amount of new housing that is expected to come forward from the sources of supply identified in the graph and in Table 2 below</u></b></li> </ol> <p><b><u>Table 2: Key Components of Housing Supply</u></b></p> <table border="1" data-bbox="262 582 1375 976"> <thead> <tr> <th><b><u>Source of supply</u></b></th> <th><b><u>Number of dwellings</u></b></th> </tr> </thead> <tbody> <tr> <td><b><u>Completions 2011-2018</u></b></td> <td><b><u>777</u></b></td> </tr> <tr> <td><b><u>Remaining completions on large unallocated sites</u></b></td> <td><b><u>510</u></b></td> </tr> <tr> <td><b><u>Allocated sites</u></b></td> <td><b><u>5261</u></b></td> </tr> <tr> <td><b><u>Windfall allowance</u></b></td> <td><b><u>522</u></b></td> </tr> <tr> <td><b><u>TOTAL</u></b></td> <td><b><u>7070</u></b></td> </tr> </tbody> </table> <p><b><u>4.2.4 The housing trajectory shows that there will need to be a significant uplift in the amount of new housing delivered every year since 2011 if the overall planned requirement of 6125 dwellings by 2036 is to be achieved. Net completions for the period 2011-2018 amount to 777 dwellings, an average of 111 per year, compared to the average annual requirement of 245 per year. The components of the trajectory show that going forward, the plan is reliant on the delivery of housing at the two sustainable neighbourhoods north and south of Melton Mowbray to achieve this uplift, but it will take until 2022/23 before both are delivering significant numbers of new homes every year at close to their full capacity. It is also realistic to expect that the local housing market will need time to adjust to much higher levels of housebuilding. To reflect these matters,</u></b></p>	<b><u>Source of supply</u></b>	<b><u>Number of dwellings</u></b>	<b><u>Completions 2011-2018</u></b>	<b><u>777</u></b>	<b><u>Remaining completions on large unallocated sites</u></b>	<b><u>510</u></b>	<b><u>Allocated sites</u></b>	<b><u>5261</u></b>	<b><u>Windfall allowance</u></b>	<b><u>522</u></b>	<b><u>TOTAL</u></b>	<b><u>7070</u></b>		
<b><u>Source of supply</u></b>	<b><u>Number of dwellings</u></b>														
<b><u>Completions 2011-2018</u></b>	<b><u>777</u></b>														
<b><u>Remaining completions on large unallocated sites</u></b>	<b><u>510</u></b>														
<b><u>Allocated sites</u></b>	<b><u>5261</u></b>														
<b><u>Windfall allowance</u></b>	<b><u>522</u></b>														
<b><u>TOTAL</u></b>	<b><u>7070</u></b>														

No.	Modification proposed	Reason for the proposed Modification	Implications for HRA findings reported previously
	<p><b><u>the annual housing requirement steps up from 170 dwellings per annum (dpa) for the period to 2021, to 245dpa for the period to 2026 and to 320 dpa thereafter. These stepped requirements are the minimum number of new dwellings that should be provided in the relevant period, and all stakeholders involved in the delivery of housing should play their part in seeking to exceed the requirements by bringing forward development in accordance with the plan policies as a whole.</u></b></p>		
	<p>Policy SS2 – Development Strategy</p> <p>Provision will be made for the development of at least 6125 homes and some 51 hectares of employment land between 2011 and 2036 in Melton Borough. <b><u>Housing delivery is planned to increase within the plan period as follows:</u></b></p> <p style="text-align: center;"><b><u>Average annual housing requirement</u></b></p> <p><b><u>2011-2021 a minimum of 170 dpa</u></b></p> <p><b><u>2021-2026 a minimum of 245 dpa</u></b></p> <p><b><u>2026-2036 a minimum of 320 dpa</u></b></p> <p>Development will be distributed across the Borough in accordance with the spatial strategy set out below: .....</p> <p><u>Service Centres and Rural Hubs will accommodate approximately 35% of the Borough’s housing requirement need (1822) on a proportionate basis. This will be delivered by planning positively for the development of sites allocated within and adjoining the Service Centres and Rural Hubs by 2036, and by encouraging small scale development, where it would enhance the sustainability of the community in accordance with Policy SS3 - Sustainable Communities.</u></p> <p>.....</p>	<p>To embed the draft modifications suggested above in policy.</p>	<p><b>No change to HRA findings</b> – the additional wording in this policy regarding the timing of housing delivery does not affect the overall scale or location of development proposed through the Local Plan. As noted above, the additional information about the trajectory of housing development could indicate that any effects arising from the Local Plan are more likely to occur later in the plan period when rates of housing development would be higher; however this would also depend on which particular developments come forward at which point within the plan period. The overall effects of the Local Plan on European sites are not affected by the proposed modification.</p>

No.	Modification proposed	Reason for the proposed Modification	Implications for HRA findings reported previously																											
	<p>5.4.7 Whilst the Local Plan as a whole includes a methodology for monitoring and trigger points for review (Appendix 5), it is considered good practice to build in flexibility within the plan itself to allow for a more robust approach and 'insulate' the need for review arising from relatively minor shortcomings on delivery, e.g. if an allocated site should become unavailable, or problems of a detailed nature are identified at application stage resulting in delay or non-delivery, or if sites cannot deliver as many new homes as envisaged. The Plan therefore includes 'reserve sites' in Melton Mowbray and Service Centre settlements where there are further suitable, available, and deliverable / developable sites to offer this flexibility and additional resilience. These are identified separately in Appendix 1 and are the subject of Policy C1(B), which also outlines the <b>limited</b> circumstances in which they could come forward. Significant flexibility is provided within Policy C1(A) through the allocations (a surplus of 422 homes*) with further flexibility provided by the reserve sites (a surplus of 562 homes), and the windfall allowance*.</p> <p><b>[footnote] *see Table 2 [MM1 above]</b></p> <p><b>Policy C1 (A) – Housing Allocations</b></p> <p><b>New housing will be delivered within the Local Plan on the following sites:</b></p> <table border="1" data-bbox="230 943 1393 1399"> <thead> <tr> <th colspan="3" data-bbox="230 943 1393 1002"><b>Melton Mowbray</b></th> </tr> <tr> <th data-bbox="230 1002 459 1078"><b>Site Reference</b></th> <th data-bbox="459 1002 1243 1078"><b>Address</b></th> <th data-bbox="1243 1002 1393 1078"><b>Capacity</b></th> </tr> </thead> <tbody> <tr> <td data-bbox="230 1078 459 1126">MNSN</td> <td data-bbox="459 1078 1243 1126">Melton North Sustainable Neighbourhood</td> <td data-bbox="1243 1078 1393 1126">1500</td> </tr> <tr> <td data-bbox="230 1126 459 1174">SMSN</td> <td data-bbox="459 1126 1243 1174">South Melton Sustainable Neighbourhood</td> <td data-bbox="1243 1126 1393 1174">1700</td> </tr> <tr> <td data-bbox="230 1174 459 1222">MEL1</td> <td data-bbox="459 1174 1243 1222">Land at Nottingham Road</td> <td data-bbox="1243 1174 1393 1222">85</td> </tr> <tr> <td data-bbox="230 1222 459 1270">MEL2</td> <td data-bbox="459 1222 1243 1270">Site of King Edward VII school, Burton Road</td> <td data-bbox="1243 1222 1393 1270">120</td> </tr> <tr> <td data-bbox="230 1270 459 1318">MEL3</td> <td data-bbox="459 1270 1243 1318">Hilltop Farm, Nottingham Road</td> <td data-bbox="1243 1270 1393 1318">45</td> </tr> <tr> <td data-bbox="230 1318 459 1366">MEL4</td> <td data-bbox="459 1318 1243 1366">Top End, Cattle Market</td> <td data-bbox="1243 1318 1393 1366">26</td> </tr> <tr> <td data-bbox="230 1366 459 1399">MEL5</td> <td data-bbox="459 1366 1243 1399">Silverdale, Scalford Road</td> <td data-bbox="1243 1366 1393 1399">16</td> </tr> </tbody> </table>	<b>Melton Mowbray</b>			<b>Site Reference</b>	<b>Address</b>	<b>Capacity</b>	MNSN	Melton North Sustainable Neighbourhood	1500	SMSN	South Melton Sustainable Neighbourhood	1700	MEL1	Land at Nottingham Road	85	MEL2	Site of King Edward VII school, Burton Road	120	MEL3	Hilltop Farm, Nottingham Road	45	MEL4	Top End, Cattle Market	26	MEL5	Silverdale, Scalford Road	16	<p>Asfordby and the deletion of LONG 4 (see <b>MM4</b> below)</p> <p>To clarify the operation of Policy C1(B).</p> <p>To indicate how sites allocated in advanced neighbourhood plans will be treated.</p>	<p>Sandpit Lane) and the addition of a new allocation at Asfordby (Land off Hoby Road) does not affect the HRA screening conclusions recorded previously for policy C1A, as the overall scale and distribution of housing development proposed through the policy remains broadly similar. The screening conclusion for this policy remains therefore as uncertain, with the policy having the potential to have likely significant effects on the integrity of Rutland Water SPA and Ramsar site (in relation to damage or loss of habitat (offsite), non-physical disturbance (offsite), air pollution and increased recreation pressure) and on Grimsthorpe SAC (in relation to increased recreation pressure only).</p> <p>The Appropriate Assessment that was undertaken previously concluded that, taking into account the mitigation built into the Local Plan, adverse effects on the integrity of European sites are not expected. This conclusion remains unchanged taking into account the proposed modifications to policy C1A.</p>

	<p>ASFH2: Further development of site ASFH2 will only be supported when local educational capacity is available, or can be created through developer contributions, to meet the needs of the site, <b><u>and provided that the proposal is sympathetic to the setting of Kirby Bellars Scheduled Monument;</u></b></p>		sites.
	<p>Asfordby General ..... Capacity of Services ..... Constraints</p> <p>The village of Asfordby has a built edge to the settlement formed by the bypass which runs west to east along the northern edge of the village. Further to the south of the village is the River Wreake, forming a barrier and legible limit to the settlement. Development proposed to the south of the village may be constrained by the flood plain relating to the River. Most sites lie in Flood Zone 1 with an exception of <b><u>two one-sites</u></b> that lie in Flood Zone 2. There will be no flood risk. Most sites lie outside the Conservation Area and there are no Scheduled Monuments or Listed Buildings on most sites with the exception of two sites where potential impacts can be resolved with careful design and mitigation measures.</p> <p>LCZ 1 is to the north of the village ..... the sites proposed in this location.</p> <p>Site allocations and specific polices</p> <p>One of the allocated sites in Asfordby (ASF1) .... .. therefore necessary on this site.</p> <p>The provision of site ASF2 would likely require the expansion of the primary school. In addition, details should be submitted with any planning application for sites ASF2 <del>and ASF3</del> showing how the noise from the bypass to the north can be mitigated sufficiently.</p>	<p>To allocate further suitable, available and deliverable site in a location that accords with the MLP spatial strategy (Policy SS2).</p>	<p><b>No change to HRA findings</b> – as described above in relation to the proposed modification to policy C1A, the addition of the new housing allocation ASF3 does not affect the conclusions of the HRA as the overall scale of development proposed through the Local Plan is not significantly affected. Asfordby is not located within close proximity of any European sites.</p>

No.	Modification proposed	Reason for the proposed Modification	Implications for HRA findings reported previously
	<p><b><u>Site ASF3 will appear as an extension to ASF1, but due to its relative remoteness from village services and facilities, its potential impact on the existing natural environment, and its proximity to the River Wreake, will need to include specific mitigation measures for connectivity, landscaping and biodiversity.</u></b></p> <p>Due to these constraints, the following policies are proposed:</p> <p>Policy ASF2: Development of site ASF2 will be supported provided :</p> <ul style="list-style-type: none"> <li>i. local educational capacity is available, or can be created through developer contributions, to meet the needs of the site.</li> <li>ii. <del>Policy ASF2: and Policy ASF3:</del> applications for the development of site ASF2 <del>and ASF3</del> shall be accompanied by a noise mitigation strategy to ensure that noise from the bypass to the north of the site is adequately mitigated.</li> </ul> <p><b><u>Policy ASF3: Development of site ASF3 will be supported provided that:</u></b></p> <ul style="list-style-type: none"> <li>iii. <b><u>It includes measures to provide utility trip connectivity for walkers, cyclists and people with disabilities, to support a sustainable travel plan for the site. In particular, it should include the retention and enhancement of a link between the Public Footpath and Bridleway across the site, so that it forms an extension to the cycleway/footway link being created along Footpath H36 to this site, and links into the adjacent development on ASF1;</u></b></li> <li>iv. <b><u>The hedgerow to the west of the site is retained and enhanced by a significant landscaped buffer zone;</u></b></li> <li>v. <b><u>The River Wreake to the south of the site is buffered from development by 20m of semi-natural vegetation;</u></b></li> <li>vi. <b><u>It includes mitigation of the harm to the great crested newt population in the vicinity;</u></b></li> <li>vii. <b><u>local educational capacity is available or can be created through developer contributions to meet the needs of the site</u></b></li> <li>viii. <b><u>it maintains visual links to the churches and landmarks in the surrounding area from public open space and through the development;</u></b></li> <li>ix. <b><u>development is sensitively placed along the countryside edges, and the height of the development at this location is no more than 2 storeys, to minimise the</u></b></li> </ul>

No.	Modification proposed				Reason for the proposed Modification	Implications for HRA findings reported previously
	<ul style="list-style-type: none"> <li>• drainage infrastructure is available to accommodate the surface water from these sites without causing or exacerbating flooding elsewhere</li> <li>• that substantial boundary landscaping and screening is provided and that all existing boundary hedges and trees are retained.</li> </ul> <p>....</p>					
	<b>Rank</b>	<b>address</b>	<b>Local Plan ref</b>	<b>capacity</b>	<b>Summary of assessment</b>	
1	Land at Melton Rd	LONG1	10	Permission 15/00547/OUT granted subject to completion of S106		
2	Corner of Broughton Lane and Hickling Lane	LONG2	35	Site is reasonably well related to existing built-up area of village, close to employment opportunities and local facilities. No significant technical objections. Limited impact upon landscape and some ecological concerns, both of which will require sensitive treatment. Site is suitable for allocation. The Education Authority have been consulted throughout this process. A solution has been found in order to increase the capacity of Long Clawson primary school with contributions.		
3	Birleys Garage, Waltham Lane	LONG3	41	The site is reasonably well related to existing built-up area of village, close to employment opportunities and local facilities. No significant technical objections or impact. Would be seen to extend the village along Waltham Lane, but mitigated by undulating landscape and existing vegetation. The updated site assessment work included refinement of the site area calculations		

No.	Modification proposed				Reason for the proposed Modification	Implications for HRA findings reported previously
				and developable areas. The potential capacity therefore decreased from 50 to 41 on this basis.		
4	Land off Sandpit Lane	LONG4	55	<del>Adjoins existing built up area of village, close to employment opportunities and local facilities. Drainage problems highlighted by current application. Some impact upon heritage assets and landscape impact will require mitigation.</del>		
5.4	RESERVE SITE: Canal Farm	LONG4 5	40	Well related to existing built-up area and removes unsightly buildings. Requires sensitive treatment to assimilate into the landscape, especially long views from the north.		
[See also Appendix 1: Map based Main Modifications to Appendix 1 – Site allocations and policies]						
	<p>Policy MEL3: Development proposals will be supported provided that:</p> <ul style="list-style-type: none"> <li>• <b><u>no development takes place within 100m of the eastern boundary of the Scheduled Monument, in accordance with planning permission 15/00593/OUT;</u></b></li> <li>• they are supported with an appropriate Heritage Assessment identifying the significance of the designated Heritage Asset and provide appropriate mitigation (in consultation with <b><u>Historic</u></b> Heritage England).</li> <li>• noise impacts resulting from the HGV traffic along St Bartholomew’s Way are assessed and where impacts identified appropriate mitigation provided.</li> </ul> <p><b><u>Policy MEL7: Development proposals will be supported provided:</u></b></p> <ul style="list-style-type: none"> <li>• <b><u>the former Work House and Vagrant Cells buildings are retained. Any loss of the buildings will be required to be fully justified and viability appraisal will be required to support any proposal requiring demolition of the buildings of local interest.</u></b></li> <li>• <b><u>A Transport Assessment is provided, identifying the impacts upon the existing highways infrastructure, in particular the junction with Thorpe Road/Wilton Road, and where required, provide for mitigation in proportion to the impacts</u></b></li> </ul>				<p>To provide appropriate protection for a nationally designated heritage asset.</p> <p>To rectify an error that resulted in the omission of this policy in the submitted plan</p>	<p><b>No change to HRA findings</b> – the additional wording in policies MEL3 and MEL7 setting out specific mitigation for the proposals does not affect the scale or location of development proposed at these sites.</p>

	<p>(ii) <b><u>housing requirement as set out in the housing trajectory, over the previous three years; or</u></b>  <b><u>The circumstances for review specified in Policies SS4 and SS5 above in respect of the masterplanning and delivery of the Melton Mowbray Sustainable Neighbourhoods, become applicable</u></b></p> <p><b><u>The review will be commenced within 6 months of occurrence of one of the above circumstances.</u></b></p> <p><b><u>Where there is a made Neighbourhood Plan, the review will be carried out in consultation with the NP 'qualifying bodies' and, where applicable, solutions prepared via the NP revision process. If a NP is in preparation but not made, the Council will inform the qualifying body who may consult with their community to identify alternative proposals for consideration.</u></b></p>		
MM9	<p><b>HOUSING NEED, INCLUDING HOUSING MIX AND AFFORDABLE HOUSING</b></p> <p>5.5.7 The 2016 Melton Borough Council Housing Needs Study (HNS), rather than the more recent 2017 Housing and Economic Development Needs Assessment (HEDNA), is used as evidence for the optimum housing mix (see Table 9) because it is based on the demographic change likely to be associated with the delivery of 245 dwellings per annum. Affordable housing is split between intermediate housing and social/affordable rented, to reflect the difference in the housing mix requirements of each. The housing mix table will <b><u>be applied having regard to the particular characteristics</u></b> <del>used together with site specific circumstances</del> <b><u>of a scheme</u></b> when providing advice on planning applications, <b><u>or where planning permission is sought. Further guidance on how housing mix will be dealt with through development management will be set out in an affordable housing and housing mix supplementary planning document. Until that document is completed, the Housing Needs Study (MBC, 2016) and the HEDNA (HEDNA, 2017) will be used as the evidence to inform the determination of planning applications.</u></b></p> <p><b><i>Table 9: <u>Optimum housing mix requirements for market and affordable housing</u></i></b></p>	To clarify the evidence that will underpin the operation of Policy C2.	<b>No change to HRA findings</b> – the amended wording in relation to housing mix does not affect the scale or location of development proposed through the Local Plan.
	<p>Policy C2 – Housing Mix</p> <p>We will seek to manage the delivery of a mix of house types and sizes to balance the current</p>	Clarification of policy.	<b>No change to HRA findings</b> – the amended wording in relation to housing mix does not affect the

No.	Modification proposed	Reason for the proposed Modification	Implications for HRA findings reported previously
	<p>housing offer, having regard to market conditions, housing needs and economic viability, taking account of the <b>site specific circumstances and the housing mix information set out in Table 9 or in any future update of the housing mix evidence.</b> <del>and site specific circumstances.</del></p> <p>Residential proposals for developments <b>for 10 or more dwellings</b> should seek to provide an appropriate mix and size of dwellings to meet the needs of current and future households in the Borough including extra care and accessible housing, having regard to the latest evidence of housing need. Residential developments which include bungalows will be particularly supported.</p> <p>Proposals for retirement homes, sheltered homes and care homes will be supported and encouraged to meet the technical standard for access of Building Regulations 2015 Part M4(2) or any subsequent revisions.</p> <p>Proposals for wheelchair accessible dwellings, where the Council is responsible for allocating or nominating residents, will be encouraged to meet the technical standard for access of Building Regulations 2015 Part M4(3), or any subsequent revisions.</p>		<p>scale or location of development proposed through the Local Plan.</p>
	<p>Policy C3 – National Space Standards and Smaller Dwellings</p> <p>Residential developments <b>for open market housing</b> will be particularly supported where the national space standard is applied to dwellings with up to and including 3 bedrooms. <b>For affordable housing, schemes using the Housing Quality Indicators standards will be supported."</b></p>	<p>To clarify extent of application of the policy.</p>	<p><b>No change to HRA findings</b> – the additional wording does not affect the scale or location of development proposed through the Local Plan.</p>
	<p>5.8.1 Affordable Housing is housing that meets the needs of those whose needs are not met by the market. It is defined by the National Planning Policy Framework and the Housing and Planning Act 2016 and any subsequent amendments. <del>– defined as "social rented, affordable rented and intermediate housing provided to eligible households whose needs are not met by the market". The Housing and Planning Act 2016 inserts a new Affordable Housing definition into the Town and Country Planning Act 1990 and includes Starter Homes (as defined by the Act).</del> <b>This definition is supplemented by further wording set out in Annex 2: Glossary of the National Planning Policy Framework.</b></p>	<p>To ensure alignment with revised NPPF.</p>	<p><b>No change to HRA findings</b> – the additional wording does not affect the scale or location of development proposed through the Local Plan.</p>
	<p>5.8.12 Based on an analysis of where new housing is planned and the minimum percentage of affordable housing that the viability study indicates can be sought in different parts of the Borough, the local plan includes a target of 1300 net additional affordable homes to be</p>	<p>To comply with NPPF</p>	<p><b>No change to HRA findings</b> – the trajectory diagram proposed for inclusion does not affect the</p>

No.	Modification proposed	Reason for the proposed Modification	Implications for HRA findings reported previously
	<p>provided. In the first five years after adoption, an uplift in new affordable homes provision is expected, arising from delivery through Section 106 agreements on sites with planning permission, small scale Registered Provider schemes and increasing newbuild by the Council. Thereafter, contributions from S106 sites, RPs and the Council are expected to be steady and sustained, underpinned by delivery at the Sustainable Neighbourhoods.</p> <p><b><u>The planned delivery of these is indicated in the affordable housing trajectory in Figure C4.2 below.</u></b></p> <p><b><u>Figure C4.2: Affordable Housing Trajectory</u></b></p> <p><b>Notes</b></p> <ol style="list-style-type: none"> <li><b><u>The planned delivery trajectory is the annual amount of new affordable housing that is expected to come forward from the sources of supply referred to in paragraph 5.8.12 above.</u></b></li> <li><b><u>The affordable housing requirement is the proportion of the remaining overall housing requirement that will be delivered as affordable housing.</u></b></li> </ol>		<p>scale or location of development proposed through the Local Plan. The additional information about the trajectory of affordable housing development could indicate that any effects arising are more likely to occur in the middle of the plan period when rates of affordable housing development would be highest; however this would also depend on which particular developments come forward at which point within the plan period. The overall effects of the Local Plan on European sites are not affected by the proposed modification.</p>
MM10	PROVISION FOR GYPSIES AND TRAVELLERS	To clarify the policy	No change to HRA findings –

No.	Modification proposed	Reason for the proposed Modification	Implications for HRA findings reported previously
	<p>Policy C6 – Gypsies and Travellers</p> <p>The most recent Gypsy and Traveller Accommodation Assessment will be used to identify pitch and plot requirements and where a need is found, steps will be taken to deliver sites. The GTAA will also be used as a basis for determining planning applications, together with the criteria within the most up to date national Planning Policy for Traveller Sites.</p> <p><del>We will support sites for Gypsies and Travellers that:</del></p> <ol style="list-style-type: none"> <li><del>1. facilitate the traditional and nomadic life of travellers while respecting the interests of the settled community; and</del></li> <li><del>2. are appropriate in scale, well designed, and provide suitable landscaping and boundary treatments; and</del></li> <li><del>3. provide an acceptable living environment for occupiers and are free from flooding, pollution, hazards or other adverse impacts on standards of living; and</del></li> <li><del>4. are well related to local infrastructure and services of a nearby town or village, including safe and convenient access to the road network; and</del></li> <li><del>5. promote peaceful and integrated co-existence between the site and the local community.</del></li> </ol>	<p>and avoid overlap with national policy.</p>	<p>the deletion of some of the policy wording does not affect the scale or location of development proposed through the Local Plan.</p>
<p><b>MM11</b></p>	<p><b>GENERAL EMPLOYMENT</b></p> <p>Policy EC1 – Employment Growth in Melton Mowbray</p> <p>The Council will seek to meet the employment needs of its residents and the wider economy, by providing sufficient new employment land for the period up to 2036 in the following locations:</p> <ol style="list-style-type: none"> <li>1. 10 hectares of employment land <del>within</del> <b>on brownfield land available at</b> Asfordby Business Park for class B employment uses (as shown on the Policies Map);</li> <li>2. 20 hectares of employment land, located off Leicester Road, as part of the South Melton Mowbray Sustainable Neighbourhood; and</li> <li>3. 1 hectare of employment land for B1(a) office space within or adjacent to Melton Mowbray town centre and/or including PERA Business Park.</li> </ol> <p>Proposals for employment development on allocated and non-allocated sites in Melton Mowbray will be allowed where:</p>	<p>To clarify growth to occur on brownfield land at Asfordby Business Park</p>	<p><b>No change to HRA findings</b> – the additional wording does not affect the scale or location of development proposed through the Local Plan.</p>

No.	Modification proposed	Reason for the proposed Modification	Implications for HRA findings reported previously
	<p>5. Do not <b>have an unacceptable</b> adversely affect <b>effect upon</b> an area’s sense of place and local distinctiveness; and</p> <p>6. Do not <b>have an unacceptable</b> adversely affect <b>effect upon</b> areas of tranquillity, including those benefiting from dark skies, unless proposals can <b>demonstrate how it is intended to contribute towards minimising light pollution.</b> be adequately mitigated through the use of buffering be adequately</p> <p>In order to mitigate potential harm to the built form at the settlement fringe and its relationship to the landscape, proposals <del>will be required to respond</del> <b>should have due regard</b> to design guidance in the individual assessments of settlement fringe sensitivity in the ‘Areas of Separation, Settlement Fringe Sensitivity and Local Green Space Study, <b>or any subsequent evidence document.</b></p> <p>Neighbourhood Plans will be encouraged to use evidence provided in the ‘Areas of Separation, Settlement Fringe Sensitivity and Local Green Space Study’ to inform site allocations and design guidance, to ensure that the Borough’s landscape will be <del>enhanced and protected</del> <b>conserved and, where possible, enhanced.</b></p>	<p>To indicate how the ‘dark skies’ clause will operate.</p> <p>To clarify operation of policy and to ensure policy responds to changing evidence.</p>	
	<p>Policy EN2 – Biodiversity &amp; Geodiversity</p> <p>The Borough Council will seek to achieve .....</p> <p>G) <b>existing, potential or proposed</b> internationally important sites, <b>such as Rutland Water Special Protection Area/Ramsar</b>, either individually or cumulatively in association with other plans or projects, <del>namely Rutland Water SPA/Ramsar;</del> .....</p> <p>.....planning obligations and management agreement.</p>	<p>To ensure alignment with revised NPPF.</p>	<p><b>No change to HRA findings</b> – the HRA Screening exercise that was undertaken previously concluded that this policy would have no likely significant effects on the integrity of European sites, and would in fact provide mitigation for the potential impacts of other proposals in the Local Plan. The proposed changes to the policy slightly strengthen the mitigation provided by the policy and there remain no likely significant effects on the integrity of European sites as the policy still does not propose new development.</p>

No.	Modification proposed	Reason for the proposed Modification	Implications for HRA findings reported previously
MM16	<p><b>GREEN INFRASTRUCTURE AND GREEN SPACE</b></p> <p>Policy EN3 – The Melton Green Infrastructure Network</p> <p>A strategic approach to the delivery, protection and enhancement of green infrastructure will be taken by the Borough Council working with partners, in order to deliver new assets where deficits have been identified in the green infrastructure strategy and to enhance the following primary green infrastructure areas:</p> <ol style="list-style-type: none"> <li>1. Melton North and Melton South Sustainable Neighbourhoods in accordance with Policy C1;</li> <li>2. Areas of Separation in accordance with Policy EN4;</li> <li>3. River Wreake and River Eye strategic corridor;</li> <li>4. Jubilee Way;</li> <li><b>5. <u>Leicestershire Round footpath</u></b></li> <li><del>5-6.</del> Melton Country Park;</li> <li><del>6-7.</del> Grantham Canal;</li> <li><del>7-8.</del> The Wolds Escarpment;</li> <li><del>8-9.</del> Burrough on the Hill Country Park; and</li> <li><del>9-10.</del> Newark to Market Harborough disused railway line.</li> </ol> <p>(+ Subsequent renumbering of bullet points in the policy thereafter)</p>	<p>For completeness and consistency of referencing of similar recreational and green infrastructure assets.</p>	<p><b>No change to HRA findings</b> – the policy (taking into account proposed modifications) still does not propose new development that could have likely significant effects on the integrity of European sites.</p>
	<p>Policy EN5 – Local Green Space</p> <p>Development proposals will be required..... Local Green Space such that its character is protected.</p> <p>Neighbourhood Plans are encouraged to designate additional Local Green Space as evidenced by the Areas of Separation, Settlement Fringe Sensitivity and Local Green Space Study <b><u>or other up to date evidence document.</u></b> <del>Spaces which have the potential for designation in the future, subject to enhancement, have been identified in the Study.</del></p>	<p>To clarify the evidence that can be used to underpin Local Greenspace Designation.</p>	<p><b>No change to HRA findings</b> – the policy (taking into account proposed modifications) still does not propose new development that could have likely significant effects on the integrity of European sites.</p>

No.	Modification proposed	Reason for the proposed Modification	Implications for HRA findings reported previously
MM17	<p><b>SETTLEMENT CHARACTER</b></p> <p><b><u>7.6.3 The guidance set out in Historic England’s Advice Note 3 should be given due consideration for managing change within the settings of heritage assets including historic buildings, sites, areas and landscapes.</u></b></p>	To add a reference to advice from Historic England.	<b>No change to HRA findings</b> – the additional wording relating to the setting of heritage assets does not affect the scale or location of development proposed through the Local Plan.
MM18	<p><i>CLIMATE CHANGE, ENERGY EFFICIENCY AND LOW CARBON DEVELOPMENT, AND ENERGY GENERATION</i></p> <p><b>Policy EN8 – Climate Change</b></p> <p><b><i>All new development proposals will be required to demonstrate how the need to mitigate and adapt to climate change has been considered, <u>subject to considerations of viability, in terms of:.....</u></i></b></p> <p><b><i>..... to support new development.</i></b></p> <p>Policy EN9 – Ensuring Energy Efficient and Low Carbon Development</p>	To respond flexibly to any variations in viability over the plan period.	<b>No change to HRA findings</b> – the policy (taking into account proposed modifications) still does not propose new development that could have likely significant effects on the integrity of European sites.
	<p><b><u>Major development proposals will be required to demonstrate how the need to reduce carbon emissions has influenced the design, layout and energy source used, subject to viability. A design and access statement will need to consider the following:</u></b></p> <p><del>Development proposals, including refurbishment, will be supported where they demonstrate the following, subject to viability:</del></p> <ol style="list-style-type: none"> <li>1. How effective use has been made of materials that have been reused, recycled, are renewable, locally sourced, have been transported in the most sustainable manner, and have low embodied energy; <del>A site waste management plan which emphasises waste minimisation, re-use and recycling during demolition and construction;</del></li> <li>2. How the design optimises natural sunlight and solar gain, and prevents overheating including providing non-mechanical means of ventilation and opportunities for cooling from tree planting and landscaping.</li> <li>3. How heat loss from all elements of the building envelope will be prevented;</li> <li>4. Water efficient measures to reduce demand on water resources, including through the use of efficient appliances, rainwater recycling, water butts and underground storage</li> </ol>	<p>To clarify the requirements for design and access statements for major development, and to restrict the scope of the policy to major development proposals.</p> <p>To remove a requirement for low carbon heat networks that has</p>	<b>No change to HRA findings</b> – the policy (taking into account proposed modifications) still does not propose new development that could have likely significant effects on the integrity of European sites.

No.	Modification proposed	Reason for the proposed Modification	Implications for HRA findings reported previously
	<p>tanks, where technically feasible;  <del>Development should be phased to ensure sufficient waste water treatment capacity is available before development is complete;</del></p> <p>5. How developments (dwellings and non-dwellings) have considered <del>On-site</del> on-site renewable, low carbon or de-centralised energy provision, including connection to existing networks, where feasible, in accordance with Policy EN10 ;</p> <p>6. Space for a home office in new homes <del>has been considered</del>;</p> <p>7. Space for cycle storage in new homes and employment sites <del>has been considered</del> and, where appropriate showers and changing facilities;</p> <p><del>8. Charging points for electric cars has been considered.</del></p> <p><del>9. A design and access statement for major development which demonstrates how the need to reduce carbon emissions has influenced the design, layout and energy source used.</del></p> <p>A site waste management plan which emphasizes waste minimization, re-use and recycling during demolition and construction will be required for major development proposals;</p> <p>Development should be phased to ensure sufficient waste water treatment capacity is available before development is complete;</p> <p>The retro-fitting of existing buildings so as to maximise opportunities to prevent heat loss from all elements of the building envelope will be supported where it:</p> <p>I. does not harm heritage assets or their significance; and  II. protects the character of conservation areas.</p>	not been justified.	
	7.18.5 All <b>major</b> development proposals will be expected to be accompanied by a <b>proportionate</b> statement of their sustainability. The statement will show.....can also support sustainable development.	To avoid unduly onerous requirements on planning applicants.	<b>No change to HRA findings</b> – the additional wording does not affect the scale or location of development proposed through the Local Plan.
	Policy EN10: Energy Generation from Renewable <b>and Low Carbon</b> Sources  <b>Renewable and low carbon energy proposals appropriate for Melton, including biomass power generation, combined heat and power (CHP), hydro, wind, solar and micro</b>	To ensure alignment with revised NPPF as well as current	<b>No change to HRA findings</b> – the policy (taking into account proposed modifications) still does not propose new development that

No.	Modification proposed	Reason for the proposed Modification	Implications for HRA findings reported previously
	<p><b>generation systems, will be supported and considered in the context of sustainable development and climate change.</b></p> <p><b>Proposals for renewable <u>and low carbon</u> energy technology, associated infrastructure and integration of renewable <u>and low carbon</u> technology on existing or proposed structures will be assessed both individually and cumulatively on their merits taking account of the following factors;</b></p> <p>.....</p> <p><b>17. The development site is in an area identified as being of low or low to moderate sensitivity to wind turbine development in the Melton and Rushcliffe Landscape Sensitivity Study 2014. These areas and acceptable turbine requirements are set out in the following table below. <u>The landscape character units are indicated on the Policies Map.</u></b></p> <p><b>In developing proposals for new thermal generating stations, developers should consider the opportunities for CHP and district heating from the very earliest point and it should be adopted as a criterion when considering locations for a project. Renewable <u>and low carbon</u> energy proposals which will directly benefit a local community in the medium and long term and/or are targeted at residents experiencing fuel poverty will be particularly supported.</b></p>	<p>NPPF.</p> <p>To insert appropriate references to the Policies Map.</p>	<p>could have likely significant effects on the integrity of European sites.</p>
<p><b>MM19</b></p>	<p><b>FLOOD RISK, FOUL WATER AND SUSTAINABLE DRAINAGE SYSTEMS</b></p> <p>Policy EN11 – Minimising the Risk of Flooding</p> <p>Melton Borough Council will ensure that ..... developers and landowners.</p> <p>The Borough Council will follow a sequential approach to flood risk management with the aim of locating development on land with the lowest risk of flooding (Zone 1 <b><u>and outside of surface water flood risk</u></b>). For development in Flood Zones 2, 3a and 3b, the exception test will be applied in accordance with Planning Practice Guidance. In addition, .....</p> <p>.....</p> <p>Proposals will need to demonstrate that the <del>there is</del> capacity of <b><u>within</u></b> the foul water sewerage network has been considered <b><u>or that capacity can be made available prior to the occupation</u></b></p>	<p>To ensure that the sequential approach is applied to both fluvial and pluvial flooding.</p> <p>To clarify how foul</p>	<p><b>No change to HRA findings</b> – the policy (taking into account proposed modifications) still does not propose new development that could have likely significant effects on the integrity of European sites.</p>

No.	Modification proposed	Reason for the proposed Modification	Implications for HRA findings reported previously
	<p><b><u>of the development.</u></b></p> <p>Proposals for flood management ..... identified in the Strategic Flood Risk Assessment have been addressed.</p>	<p>water sewerage capacity should be considered.</p>	
	<p><b><i>Policy EN12 – Sustainable Drainage Systems</i></b></p> <p><b><i>Surface water management should be undertaken, wherever practicable through the utilisation of appropriate SuDS techniques</i></b> which mimic natural drainage patterns, and where appropriate achieve net gains for nature through the creation of ponds and wetlands near watercourses <b><u>and the introduction of blue green corridors.</u></b></p>	<p>To clarify how SuDS can provide net gains for nature.</p>	<p><b>No change to HRA findings</b> – the policy (taking into account proposed modifications) still does not propose new development that could have likely significant effects on the integrity of European sites.</p>
<p><b>MM20</b></p>	<p><b>INFRASTRUCTURE DELIVERY</b></p> <p>8.4.3 In the rural area, a number of schools are likely to require developer contributions to help meet the costs of providing additional pupil places, either through an extension to existing schools or through replacement with a new larger school. <b><u>In such circumstances it would be appropriate to seek from developers the full costs of expanding schools rather than a contribution based on the yield rates and cost multipliers. The County Council would wish to see the contribution paid at a very early stage of development to ensure the early availability of places as new housing becomes occupied. If this is not achievable or possible then the County Council may also seek an additional contribution to cover transport transitional costs for pupils to nearby schools having a place, until such time as the new accommodation is available in the locality.</u></b></p>	<p>To reflect update to IDP and comments from LCC Education.</p>	<p><b>No change to HRA findings</b> – the additional wording relates to the mechanisms through which new educational provision would be made, and does not itself propose additional development.</p>
	<p>8.4.4 At secondary school level, the required places resulting from development justify additional provision, as anticipated pupil numbers cannot be accommodated at existing school sites over the plan period. Extensions to <b><u>Longfield Academy,</u></b> John Ferneley College and Belvoir High School are required, <del>as well as provision within the South Sustainable Neighbourhood for a new 600 place secondary school.</del> <b><u>Costs have been estimated for Longfield Academy expansion which are in excess of funds from developer contributions based on the yield rates and cost multipliers. To expand John Fernley College will require additional land. Further discussion is required</u></b></p>	<p>To reflect updated IDP and LCC Education position.</p>	<p><b>No change to HRA findings</b> – the additional school referred to as requiring extension is not in the vicinity of any European sites and the overall scale of development proposed through the Local Plan is not affected by the additional text.</p>

No.	Modification proposed	Reason for the proposed Modification	Implications for HRA findings reported previously
	<p><u>with both Academy Trusts and Melton Borough Council.</u></p> <p><b><u>8.4.5 Leicestershire County Council has a duty to ensure that there is sufficient early learning and childcare for children from 0 to 14 years old for working parents. Leicestershire County Council’s Early Learning and Childcare Service is looking at how developer contributions can be sought to help provide early years places by, for example, adding early years provision onto new school builds which could be run by the school or a private provider.</u></b></p>	<p>To Introduce the prospect of developer contributions for early years places.</p>	
<b>MM21</b>	<p><i>DESIGN</i></p> <p><b><i>Policy D1 – Raising the Standard of Design</i></b></p> <p><b><i>All new developments should.....</i></b></p> <p><b><i>j) Performs well against Building for Life 12 or any subsequent guidance and seeks to develop the principles of ‘Active Design’ for housing developments.</i></b></p> <p><b><i>k) makes adequate provision for car parking; and</i></b></p> <p><b><i>l) development should be managed .....safeguarding and improving health and well-being for all.</i></b></p>	<p>To ensure the most up to date guidance is used.</p>	<p><b>No change to HRA findings</b> – the policy (taking into account proposed modifications) still does not propose new development that could have likely significant effects on the integrity of European sites.</p>
	<p>9.4.14 The potential to reduce the risk of crime and anti-social behaviour <b><u>and to promote public safety</u></b> should be maximised though the design and layout of new development.....Gated communities, for example, will not normally be permitted.</p>	<p>To ensure alignment with revised NPPF as well as existing NPPF.</p>	<p><b>No change to HRA findings</b> – the additional wording does not affect the scale or location of development proposed through the Local Plan.</p>
	<p><b><u>Design Review</u></b></p> <p><b><u>9.4.19 Design Review is a tried and tested method of promoting good design and is a cost effective way to improve quality. Applicants will be encouraged to engage in design review for all new major developments.</u></b></p>	<p>To promote a tool to improve quality of new developments.</p>	<p><b>No change to HRA findings</b> – the additional text refers to the design of new development rather than its scale or location.</p>

No.	Modification proposed	Reason for the proposed Modification	Implications for HRA findings reported previously
MM22	<p><b>AGRICULTURAL WORKERS' DWELLINGS</b></p> <p>Policy D3 – Agricultural Workers’ Dwellings</p> <p><b><u>J) Applications for agricultural / rural workers’ dwellings should be of an appropriate size and scale. Applications for dwellings with extensive facilities which are deemed to be excessive and beyond the remit of the operation will be refused.</u></b></p> <p><del>9.5.5 Applications for agricultural/rural workers’ dwellings should be of an appropriate size and scale. Applications for a dwelling with extensive facilities which are deemed to be excessive and beyond the remit of the operation will be refused.</del></p>	<p>Statement moved from reasoned justification to policy.</p>	<p><b>No change to HRA findings</b> – incorporating the wording previously within the supporting text into the policy itself does not change the overall scale or location of development that could result.</p>

## Updated assessment of in-combination effects

- 1.22 A number of Melton's neighbouring authorities were identified as relevant for identifying potential in-combination effects as part of the original HRA for the Pre-Submission Draft Local Plan (October 2016). A review of that in-combination effects assessment was previously undertaken during the preparation of the Technical Note for the Focussed Changes (June 2017), in order to identify any relevant local plan documents or HRA work which had been published since the previous Appropriate Assessment was carried out, which might have identified further in-combination effects. At that time, no further in-combination effects were identified with the Local Plan.
- 1.23 The in-combination effects assessment has again been updated and the findings are set out below.

### Rushcliffe Borough Council

- Rushcliffe Local Plan Part 2 – Further Options consultation was carried out between February and March 2017.
- No HRA work has been published to date - no in-combination effects to consider.

### Newark and Sherwood District Council

- Plan review of the Newark and Sherwood Core Strategy (adopted 2011) and Allocations and Development Management DPD (adopted 2013) – Publication Amended Core Strategy consultation took place between July and September 2017.
- The HRA re-screening (July 2017) identified Likely Significant Effects on bird species at the Sherwood Forest pSPA; however these could be mitigated. The pSPA would not be affected by the Melton Local Plan; therefore there are no in-combination effects to consider.

### South Kesteven District Council

- The Consultation Draft Local Plan was published for consultation in 2017 along with an accompanying Habitats Regulations Assessment Report. The Screening stage of the HRA concluded that none of the policies in the Draft Local Plan are likely to have significant effects on any European sites and therefore Appropriate Assessment was not required.

### Rutland County Council

- The Consultation Draft Local Plan was published for consultation in July 2017 along with an accompanying Habitats Regulations Assessment Report. The HRA Screening assessment identified potential Likely Significant Effects on three European sites: Rutland Water SPA/Ramsar site, Barnack Hills and Holes SAC and Grimsthorpe SAC. The HRA report recommends a number of policy amendments to address these impacts, and concludes that the next iteration of the Local Plan will need to be subject to further HRA screening. Therefore, the previous conclusion that it cannot yet be determined with certainty whether there will be in-combination effects with the Melton Local Plan remains.

### Harborough District Council

- The Harborough Local Plan was submitted in March 2018, along with an accompanying HRA Report. The HRA concluded that development in the Harborough Local Plan will not have a likely significant effect on any internationally important wildlife sites either alone or in combination with other plans and projects.

### Charnwood Borough Council

- No further updates to the local plan - no in-combination effects to consider.

## Conclusions

- 1.24 This HRA Addendum has assessed the proposed Main Modifications to the submitted Melton Local Plan and, as shown in detail in **Table 2**, they have no implications for the conclusions reported previously in the HRA Report for the Pre-Submission Draft Local Plan (October 2016) and updated in the Technical Note for the Focussed Changes (June 2017).
- 1.25 Therefore, the conclusions of the HRA for the Melton Local Plan remain that the Local Plan (taking into account the proposed Main Modifications) is not likely to have adverse effects on the integrity of European sites, either alone or in-combination with other plans or projects, providing that the mitigation set out in the Local Plan is implemented.

## Next Steps

- 1.26 This HRA Addendum will be available for consultation alongside the proposed modifications to the Local Plan.
- 1.27 Following the consultation on the proposed modifications and this HRA Addendum (as well as the separate Sustainability Appraisal Addendum), the Inspector will consider the representations raised and report on the modified Local Plan's soundness.
- 1.28 If the Local Plan is found to be 'sound', it can be formally adopted by Melton Borough Council.
