

We have recently received a leaflet from Melton North Action Group suggesting we comment on the local plan.

We moved to Melton 5 years ago and the centre of town is a nightmare especially on Market days-a bypass is definitely needed.

Public transport needs to be improved, incentivised and advertised to promote its use.

People need encouraging to use pedestrian and cycle routes instead of using cars for short journeys-to aid this the link from Scholars Grange to the Country Park needs to be completed-it is ridiculous that people need to drive cars to access a beautiful park which is only yards away from where they live- easy access to recreation and wild life is important for all age groups.

I personally would like there to be a choice of doctors surgeries the present one is too large and can be bewildering and intimidating.

I would also like joint access to both leisure centres in the town as this would provide access to more facilities-these gyms could both include a small café with healthy choices-income from these could go back to the councils coffers.

Thank you for your attention.

Gillian Maggs
