

Further to my last email with the second Land Registry attachment.

As you have described the NPG process as being open and transparent, please will you supply the following information (some of that info previously requested by me) but yet to supplied >

- 1) A copy of the Stakeholder's letter and accompanying sketch as listed in the final NP appendix.
- 2) When was the decision made to include this change, by whom, what date and where is this recorded in the local NP process as I cannot find the relevant NP minutes on the WOTWATA website.? By this, I do not mean the signing off of the Final NP submission. Were there any relevant pecuniary statements made during this decision process? .
- 3) A copy of the MBC Ref 80 planning application referenced in your last email. Was this document presented at the time of the Stakeholders' application. If not, when was this document examined by the NPG? or is this a retrospective document review following my challenge?.

I am hoping that these details also will be made available for the NP Reg 16 process and independent examination.

Gareth,

I have already replied at length to your concern about this change to the Limits to Development for Thorpe Arnold, both over the telephone and via in my email of 21 August. The latter response has the support of my NP Group colleagues and has been endorsed by Jim Worley.

I am now met with a further barrage of questions. **Frankly, enough is enough.** We have tried to be reasonable and open about this issue but you are not responding in the same way. Please don't send me any more correspondence on the subject until you formally withdraw and apologise for the libellous allegation that the Neighbourhood Planning Group has in any way behaved incorrectly or deviated from the legally-required consultation process.

Regards,
Cllr Martin Lusty
